Choosing a Technology Voki

After you have planned your lesson and designed your activities it is now time to pick a technology.

There are many options in choosing your technology. Included in this section are several excellent websites that introduce the various technologies and how to utilize them. Some will mention special technology tools such as; graphic organizers (including Inspiration, Kidspiration and Boardmaker – which the library owns and loans out), test, puzzle and timeline makers (which are found online and in the TERC area for loan) and presentation equipment found in Milne’s Digital Media Lab.

In addition Milne offers technology consultations to help in utilizing any of the technologies you discover. The link to technology consultations is listed below.
